June 2, 1970.

Chairman,
Public Works Department,
455 Worcester,
Wellesley, Massachusetts, 02180.

Dear Sir:

In the past it has been the custom to request permission for use of the lawn area of City Hall, from the Town Selectman. However last year we were advised such request should be made to you.

As in past years, The Wellesley Amateur Radio Society plans to operate in the National Contest called Field Day. This is a test of operating ability under simulated emergency conditions. Once again, as in past years, we would appreciate use of the lawn area of City Hall for this event.

Field Day will be held June 27-28 this year, and we see no changes in our plans from previous years. This means we expect to show the same care for the area as has been shown in the past. We do plan this year to make a higher score, and possibly therefore to operate several more stations. But this in no way effects the request for permission.

Chairman for the affair this year is Mr. John Porter, K1PRB, 232 Oakland Street, Wellesley Hills. Our President is Dr. William Emerson, WA1EVD, 115 Westgate Road, Wellesley Hills, I am certain any questions regarding previous operation from the site can be obtained from either person. Also, Mr. George deCoen is familiar with the club and its past operations, and can also advise you if required.

Your permission and assistance has been appreciated in the past, and we hope the club gets a much better score this year. Having graduated many new Amateurs this past year we have more operators, and expect to do much better.

Sincerely,

James M. Crump III, W1EWN
Secretary.
